OBJECTIVE

An engineering student passionate about building solutions that can solve real-world problems and create meaningful impact. I enjoy learning by doing, working with others, and turning ideas into something useful. Always open to new challenges that help me grow both technically and personally.

INTERNSHIP

The Yellow Network

AI & Full stack Development

Dec 2025–April 2026

- Developed Truth vs Noise, a full-stack web platform using **React.js, Node.js and MongoDB**, ensuring seamless interaction and efficient information analysis.
- Implemented user authentication (signup with opt and login) with secure **JWT-based user access**.
- Collaborated with a team of 6 in developing an automated **Invoice Analyser System** using Python and React.js to process invoice images and PDFs efficiently.
- Optimised database queries in **PostgreSQL** then migrated to neonDB for production ready.

EDUCATION

Bachelor of Engineering

Government College Of Technology, Coimbatore – CGPA 8(CSE)

2023–2027

PROJECTS

ServletBanking

- Built a Java web banking application using **Servlets, JSP, and JDBC** to support account creation, balance checks, deposits, and withdrawals.
- Connected the application to a **MySQL** database to store and update account information.

Personal Portfolio

- A curated collection of projects and achievements, built using **HTML, CSS and JavaScript** demonstrating strong front-end development skills.
- Includes interactive features and user-friendly interfaces. Deployed and accessible online via GitHub Pages: [Portfolio](#), showcasing both code quality and project functionality.

SKILLS

- Programming Languages: Java, C, Node.js, Python
- Web Technology: HTML, CSS, JS, React.js
- Tools & Platforms: GitHub, Postman, n8n, Canva, Figma

CERTIFICATIONS

- Deep Learning – [Elite+Silver](#) [NPTEL]
- The Joy of Computing using Python – [Elite+Gold](#) [NPTEL]
